REFER

When people return to violence, it can be difficult for workers and can create worry, stress and disappointment. On average, it takes between 7-13 attempts at leaving violent relationships, and this is also the most dangerous time. Please know that by keeping the 'door open', making sure clients know they can come back to see you, and having conversations about safety makes a difference.

RESTORE

Your safety and wellbeing are paramount. When working with people who experience DFV, it is normal to feel a range of emotions and concern for their safety and wellbeing. Please make sure you debrief and get support from your supervisor or manager, and take time to practise self-care. You can also call 1800 Respect for support and to talk through your concerns and experiences.

Our community needs good bystanders to 'say no' to DFV.
